COMSTOCK RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 1995 and 1994
(Unaudited)

(1) SIGNIFICANT ACCOUNTING POLICIES -

Basis of Presentation -

In management's opinion, the accompanying consolidated financial statements contain all adjustments (consisting solely of normal recurring adjustments) necessary to present fairly the financial position of Comstock Resources, Inc. and subsidiaries (the "Company") as of March 31, 1995 and the related results of operations and cash flows for the three months ended March 31, 1995 and 1994.

The accompanying unaudited financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to those rules and regulations, although the Company believes that the disclosures made are adequate to make the information presented not misleading. These financial statements should be read in conjunction with the Company's financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 1994.

The results of operations for the three months ended March 31, 1995 and 1994, are not necessarily an indication of the results expected for the full year.

The Company periodically reviews the carrying value of its proved oil and gas properties for impairment in value on a company-wide basis by comparing the net capitalized costs of proved oil and gas properties with the undiscounted future cash flows after income taxes attributable to proved oil and gas properties. Under this policy, no impairment in carrying value has been required during 1995 and 1994. However, in March 1995 the Financial Accounting Standards Board issued Standard No. 121, "Accounting for the Impairment of Long-Lived Assets." Beginning in 1996, this standard requires an assessment of fair value of oil and gas properties to be performed using certain groupings of property costs. Fair value is to be measured by market value, if an active market exists. If the market value is not readily determinable, discounted future net cash flows, after income taxes, are to be used to estimate fair value. The impact of adoption of this standard on the consolidated financial statements of the Company has not been determined.

Supplementary Information with Respect to the Statements of Cash Flows -

The Company paid cash for interest of \$976,633 and \$555,715 during the three months ended March 31, 1995 and 1994, respectively. No cash for income taxes was paid in the three months ended March 31, 1995 and 1994.

COMSTOCK RESOURCES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(continued)

The following is a summary of the significant noncash investing and financing activities:

	For the Three Months Ended March 31,	
	1995	1994
Common stock issued for director compensation	\$ 113,000	\$ 113,000
Common stock issued for preferred stock dividends	\$ 289,000	\$ 126,000

Earnings Per Share -

Net income (loss) attributable to common stock represents net income (loss) less preferred stock dividend requirements of \$289,110 and \$126,000 for the three months ended March 31, 1995 and 1994, respectively. Net income (loss) attributable to common stock per share is computed by dividing net income (loss) attributable to common stock by the weighted average number of common shares and common stock equivalents outstanding during each period. Common stock equivalents include, when applicable, dilutive stock options and warrants using the treasury stock method.

(2) LONG-TERM DEBT -

At March 31, 1995, the Company had \$35,555,000 outstanding under a \$50 million five year revolving credit agreement with two banks. Amounts outstanding under the bank credit facility bear interest at the agent bank's prime rate plus 1 1/2% and cannot exceed a borrowing base determined semiannually by the banks. The borrowing base at March 31, 1995 was \$36,775,000 and will reduce by \$675,000 each month until the next redetermination.

(3) SUBSEQUENT EVENTS -

On April 13, 1995, the Company entered into an agreement to acquire certain producing offshore oil and gas properties located in Louisiana state waters in the Gulf of Mexico for \$8,199,000. The acquisition includes interests in fourteen producing oil and gas wells, (3.5 net wells). The Company estimates that the interests being acquired have proved oil and gas reserves of approximately 1,044,000 barrels of oil and 1.1 billion cubic feet of gas as of November 1, 1994, the effective date of the purchase.

On April 21, 1995, the Company entered into a letter of intent to acquire certain producing oil and gas properties and gas gathering systems located in East Texas and North Louisiana for \$51.25 million. The acquisition is subject to the parties executing a mutually agreeable purchase and sale agreement, clearance by the Federal Trade Commission and Board of Directors' approval by the Company and the Seller. The Company would be acquiring interests in 330 (180 net) oil and gas wells and would operate 248 of these wells. The Company estimates that the interests being acquired have proved oil and gas reserves of approximately 102 billion cubic feet of natural gas and 855,000 barrels of oil as of March 1, 1995, the proposed effective date of the acquisition. The acquisition includes 78 miles of gathering systems serving 126 gas wells. The systems have a capacity of 65,000 Mcf per day and a current throughput of 23,000 Mcf per day.

LIQUIDITY AND CAPITAL RESOURCES

Financial Position -

Total assets at March 31, 1995 were \$88.3 million as compared to total assets at December 31, 1994 of \$91.6 million. At March 31, 1995, the Company had a working capital deficit of \$6.7 million, as compared to a working capital deficit of \$5.9 million at December 31, 1994. Working capital at March 31, 1995 includes \$6.9 million in current maturities under the Company's bank credit facility which will be repaid out of cash flow from the Company's oil and gas properties.

In March 1995, the Financial Accounting Standards Board issued Standard 121, "Accounting for the Impairment of Long-Lived Assets." Beginning in 1996, this standard requires an assessment of fair value of oil and gas properties to be performed using certain groupings of property costs. Fair value is to be measured by market value, if an active market exists. If the market value is not readily determinable, discounted future net cash flows, after income taxes, are to be used to estimate fair value. The impact of adoption of this standard on the consolidated financial statements of the Company has not been determined.

On April 13, 1995, the Company entered into an agreement to acquire certain producing offshore oil and gas properties located in Louisiana state waters in the Gulf of Mexico for \$8,199,000. The acquisition includes interests in fourteen producing oil and gas wells, (3.5 net wells). The acquisition will be funded by borrowings under the Company's bank credit facility.

On April 21, 1995, the Company entered into a letter of intent to acquire certain producing oil and gas properties and gas gathering systems located in East Texas and North Louisiana for \$51.25 million. The acquisition is subject to the parties executing a mutually agreeable purchase and sale agreement, clearance by the Federal Trade Commission and Board of Directors' approval by the Company and the Seller.

Sources and Uses of Capital Resources -

During the three months ended March 31, 1995, the primary sources of funds for the Company were cash generated from operations of \$167,000. Primary uses of funds for the Company for the three months ended March 31, 1995 were capital expenditures of \$739,000 and principal payments on debt of \$2.1 million.

RESULTS OF OPERATIONS

Earnings -

The Company reported a net loss of \$432,000 for the three months ended March 31, 1995, before dividends of \$289,000 to holders of the Company's preferred stock. The 1995 first quarter results compare to net income of \$314,000 before preferred stock dividends of \$126,000 for the three months ended March 31, 1994. Net loss attributable to common stock per share for the first quarter of 1995 was 6c. on weighted average shares of 12.3 million as compared to net income attributable to common stock per share of 2c. on weighted average shares of 12.3 million for the first quarter of 1994.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS
(continued)

Revenues -

Revenues for the three months ended March 31, 1995 were \$14.6 million as compared to \$4.3 million in revenues for the same period in 1994. Revenues in 1995 include gas marketing sales of \$10.5 million related to the Company's gas marketing activities which commenced in June 1994 and \$191,000 in gas gathering and processing revenues. Oil and gas sales were \$3.8 million for the three months ended March 31, 1995 as compared to \$4.3 million for the three months ended March 31, 1994. The decrease in oil and gas sales primarily relates to the decrease in prices received for natural gas sales during the first quarter of 1995. Gas production for the first three months of 1995 was 1,635,000 thousand cubic feet ("Mcf") which was sold at an average price of \$1.69 per Mcf as compared to 1,644,000 Mcf sold at an average price of \$2.00 per Mcf for the first three months of 1994. Oil production for the first three months of 1995 was 63,600 barrels which was sold at an average price of \$16.48 per barrel as compared to 74,400 barrels sold at an average price of \$13.12 per barrel for the first three months of 1994.

Expenses -

Total expenses increased from \$4 million for the three months ended March 31, 1994 to \$15 million for the three months ended March 31, 1995. The increase is primarily due to cost of gas purchased for the Company's gas marketing activities of \$10.2 million during the first quarter of 1995. Oil and gas operating expenses for the quarter ended March 31, 1995 were \$1.5 million, as compared to \$1.4 million for the first quarter of 1994. Lifting costs per equivalent unit of production for the first quarter of 1995 were 74c. per equivalent Mcf as compared to 69c. per equivalent Mcf for the first three months of 1994.

Depreciation, depletion and amortization for the first three months of 1995 was \$1.8 million as compared to the provision for the first three months of 1994 of \$1.7 million. Depletion and depreciation per equivalent unit of production was 86c. per equivalent Mcf for the first three months of 1995 as compared to 78c. per equivalent Mcf for the first quarter of 1994.

General and administrative expenses totaled \$499,000 for the first quarter of 1995 as compared to general and administrative expenses of \$274,000 for 1994's first quarter. The increase relates to the increase in the Company's staffing level. General and administrative expenses in 1995's first quarter also include \$162,000 related to the Company's gas marketing activities which began in June 1994.

Interest expense for the first three months of 1995 was \$977,000 as compared to \$622,000 for the first three months of 1994. The increase in interest expense relates to the increase in debt outstanding under the Company's bank credit facility as well as an increase in interest rates.
