Financial Results for the Three Months Ended June 30, 2022

Revenues in the second quarter of 2022 totaled \$604.0 million (including realized hedging losses of \$257.4 million). Net cash provided by operating activities (excluding changes in working capital) generated in the second quarter was \$457.9 million, and net income available to common stockholders for the second quarter of 2022 was \$372.5 million or \$1.36 per share. Reported net income in the quarter included a pre-tax \$184.5 million unrealized gain on hedging contracts held for risk management and a \$46.8 million loss on early retirement of senior notes in the quarter. Comstock's production cost per Mcfe in the second quarter averaged \$0.74 per Mcfe, which was comprised of \$0.30 for gathering and transportation costs, \$0.20 for lease operating costs, \$0.18 for production and other taxes and \$0.06 for cash general and administrative expenses. Production cost was \$0.69 per Mcfe in the first quarter of 2022 and \$0.59 in the second quarter of 2021. The increase is due to higher production taxes resulting from higher natural gas prices in the quarter. Comstock's unhedged operating margin was 89% in the second quarter of 2022 and 85% after hedging.

Financial Results for the Six Months Ended June 30, 2022

Drilling Results

Comstock drilled 18 (16.5 net) operated horizontal Haynesville/Bossier shale wells in the second quarter of 2022 which had an average lateral length of 9,924 feet. The Company also participated in an additional 13 (1.9 net) non-operated Haynesville shale wells in the second quarter of 2022. Comstock turned 16 (14.4 net) wells to sales in the second quarter of 2022 and currently expects to turn an additional 14 (13.2 net) wells to sales in the third quarter of 2022.

Since its last operational update in May, Comstock has turned 14 (12.6 net) new operated Haynesville/Bossier shale wells to sales. These wells had initial daily production rates that averaged 26 MMcf per day. The completed lateral length of these wells averaged 9,577 feet. Included in the reported drilling results was Comstock's successful Circle M well drilled in Robertson County, Texas in the Western Haynesville area. The well was completed with a 7,900 foot lateral and was tested at 37 MMcf per day.

During the second quarter, Comstock completed an acquisition which included approximately 60,000 net acres prospective for the Haynesville and Bossier shale in East Texas, a 145 mile high pressure natural gas pipeline and a natural gas treating plant for \$35.6 million.

Natural Gas Certification

Comstock announced it has achieved certification for its operated natural gas production under the MiQ standard for methane emissions measurement and management. The MiQ Standard scores production, based on how well operators deploy integrated technologies to detect, measure, and abate emissions while also including a detailed assessment of policies and work practices that evaluate an operator's preparedness to prevent future methane emissions. The certification highlights Comstock's ongoing commitment to produce natural gas under strict environmental standards and deliver differentiated, independently certified gas based on methane intensity to both domestic and international markets. Comstock received the certification in June 2022 and the first block of the Company's certified natural gas is available for trading. The certificates, which can be traded bundled (combined with natural gas delivery) or unbundled, will be available on MiQ's Digital Registry in the coming weeks. The certification covers all the Company's facilities in North Louisiana and East Texas, which currently produce approximately 2.0 billion cubic feet per day of natural gas.

Gain on sale of assets		(19)		(9)		(21)		(79)
Total Adjusted EBITDAX (4)	\$	515,041	\$	251,418	\$	848,035	\$	513,765

⁽¹⁾ Adjusted net income available to common stockholders is presented because of its acceptance by investors and by Comstock management as an indicator of the Company's profitability excluding loss on early retirement of debt, non-cash unrealized gains and losses on derivative financial instruments, gains and losses on sales of assets and other unusual items.

⁽²⁾ Adjusted net income available to common stockholders per share is calculated to include the dilutive effects of unvested restricted stock pursuant to the two-class method and performance stock units and preferred stock pursuant to the treasury stock method.

⁽³⁾ Includes realized gains or losses from interest rate derivative financial instruments.

⁽⁴⁾ Adjusted EBITDAX is presented in the earnings release because management believes that adjusted EBITDAX, which represents Comstock's results from operations before interest, income taxes, and certain non-cash items, including loss on early retirement of debt, depreciation, depletion and amortization and exploration expense, is a common alternative measure of operating performance used by certain investors and financial analysts.
